# 1

## Challenges in data sharing

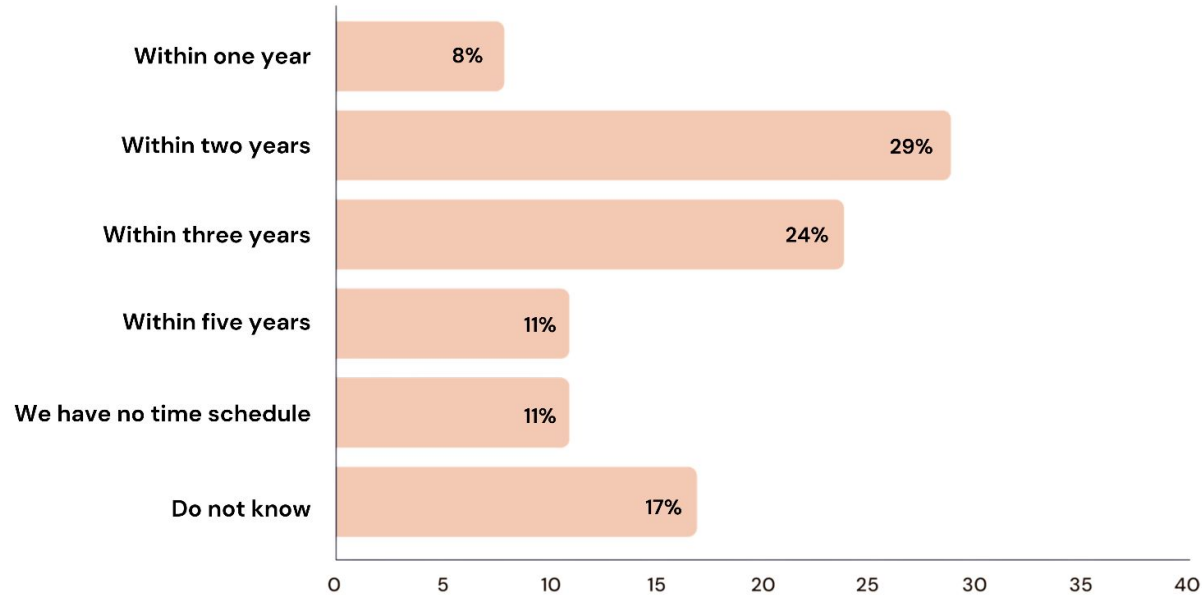

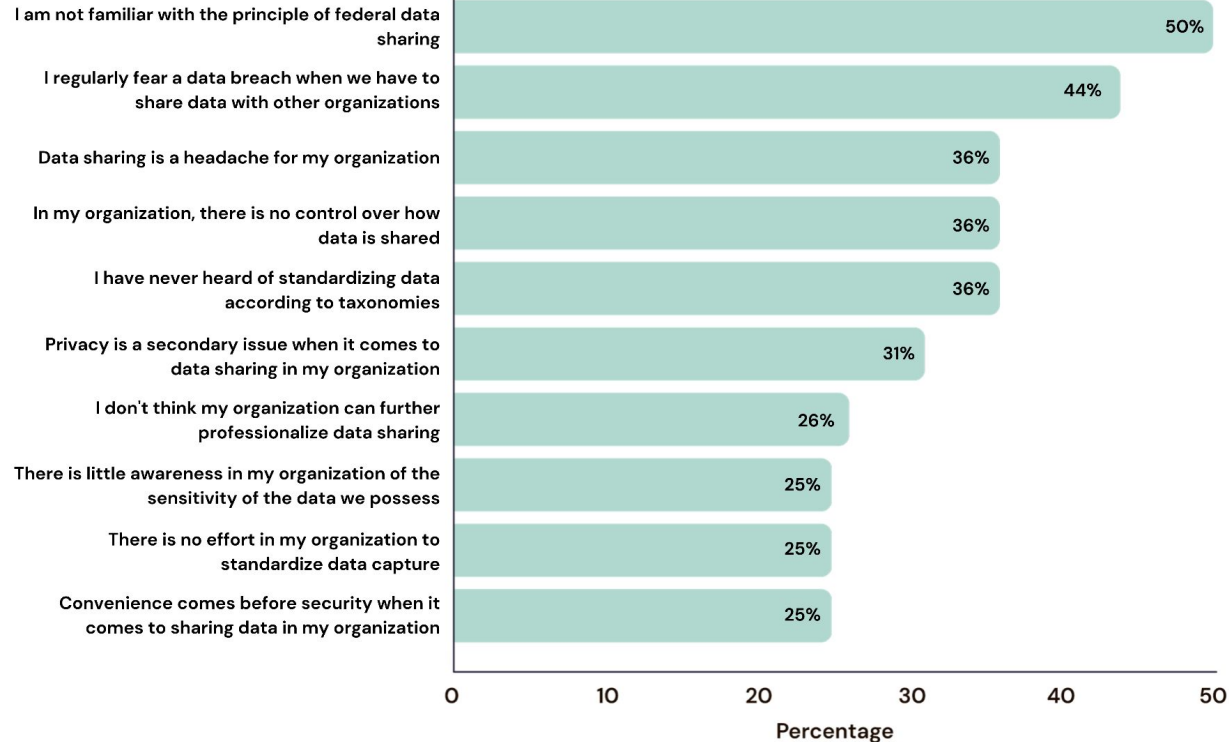

# Insufficient resources (time, budget or knowledge)

# Automating data sharing is on the agenda, but the timeline varies

# Limited awareness of sensitive data risks

# 2

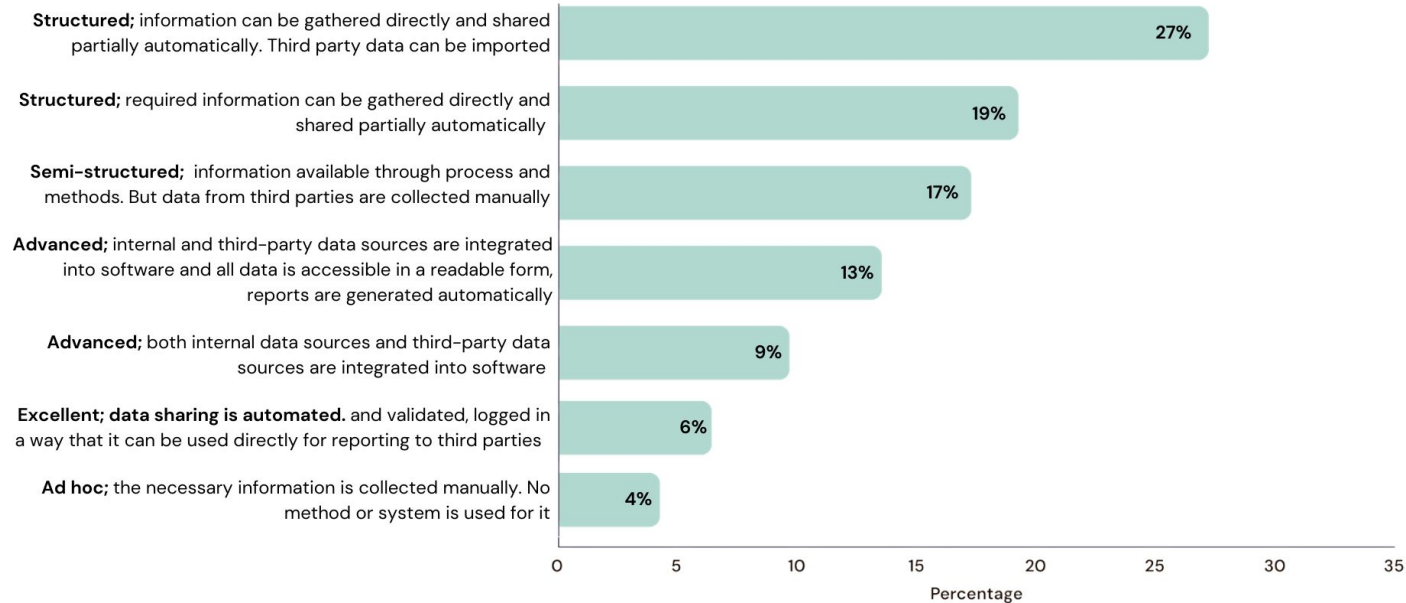

## Interactive quiz

# 1. What percentage of Dutch organizations share their available data in a structured way?

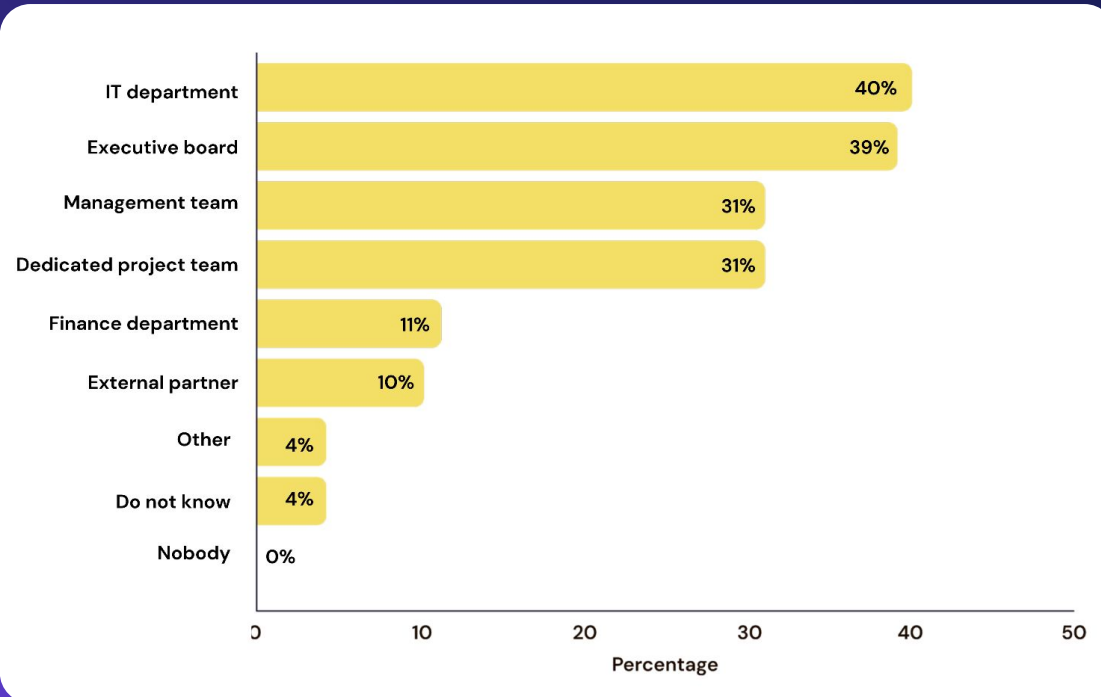

Structured: the required information can be gathered directly and partially shared in an automated way. Data from third parties can be imported.

# 27% of the organizations share data in a structured manner

**2. Which department is, according to most organizations, responsible for staying informed about upcoming legislation regarding data sharing?**

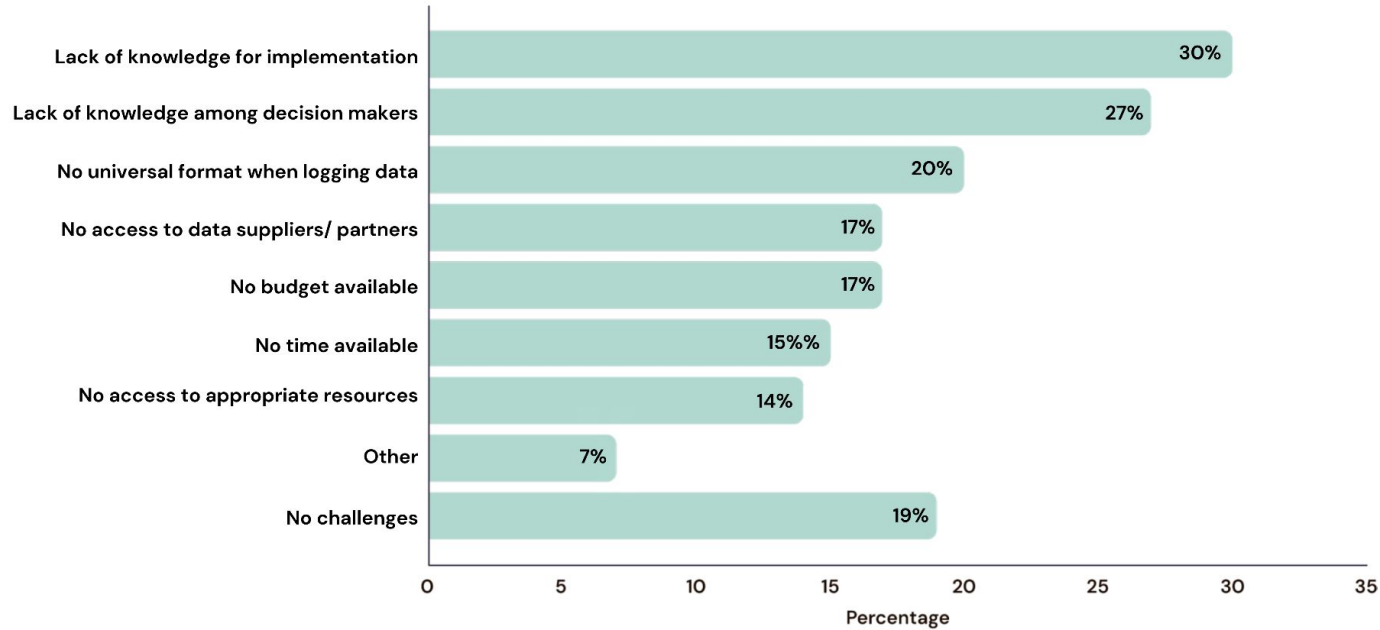

# 40% indicates that this responsibility lies with the IT department.

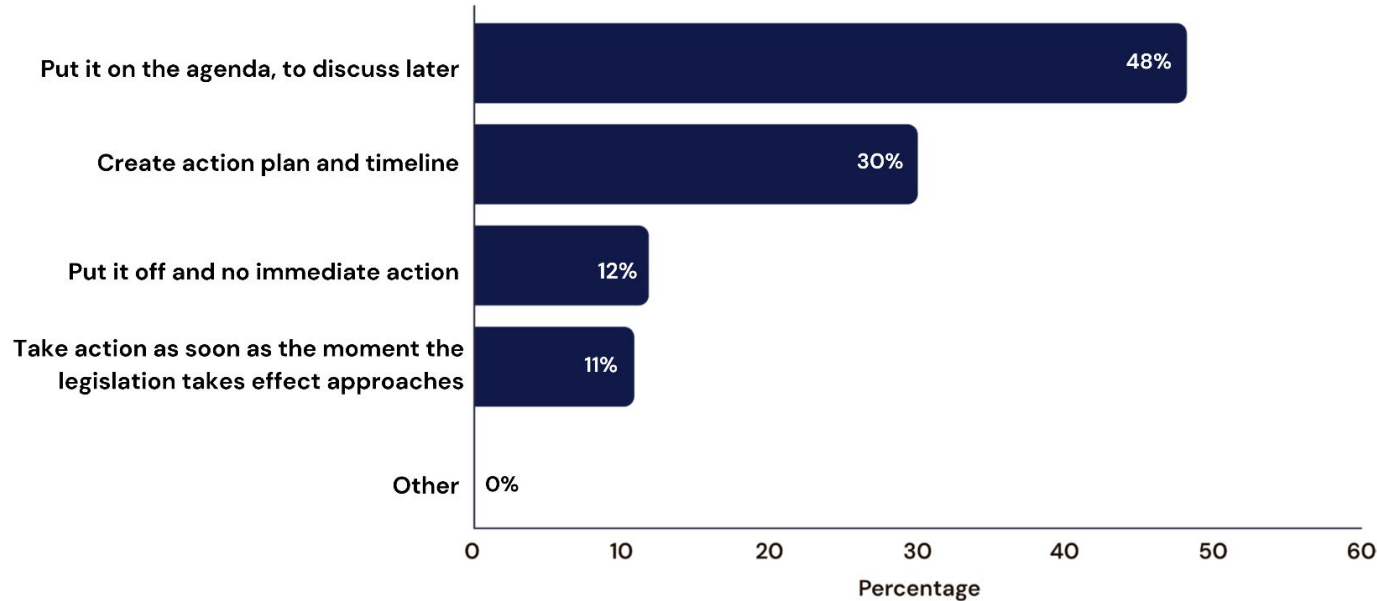

**3. What is the biggest challenge for organizations regarding the implementation and compliance with new legislation?**

# Lack of knowledge is biggest challenge

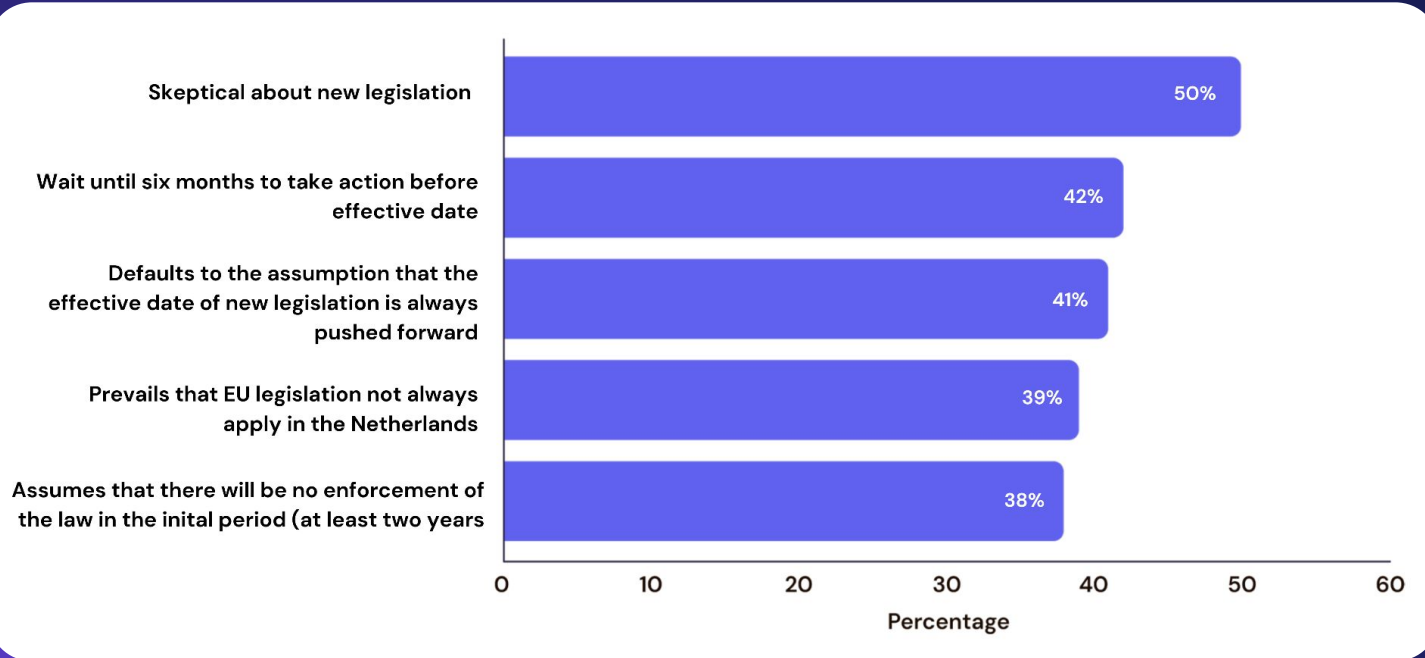

**4. What percentage of organizations create an action plan when new legislation is announced?**

# 30% of the organizations create an action plan

**5. What percentage of organizations are skeptical about the implementation of new legislation?**

# 50% of organizations are skeptical about new legislation

3

## Case study: TIP

# Trusted Information Partners

- Trusted Information Partners (TIP) is an initiative of various market and public parties, working towards a future where citizens, entrepreneurs, and the government can do business digitally in a simple and reliable way.
- We are conducting a pilot with the Tax Authority in the process of retrieving the pre-filled tax return.
- **Goal:** secure and reliable digital data exchange.

# Trusted Information Partners

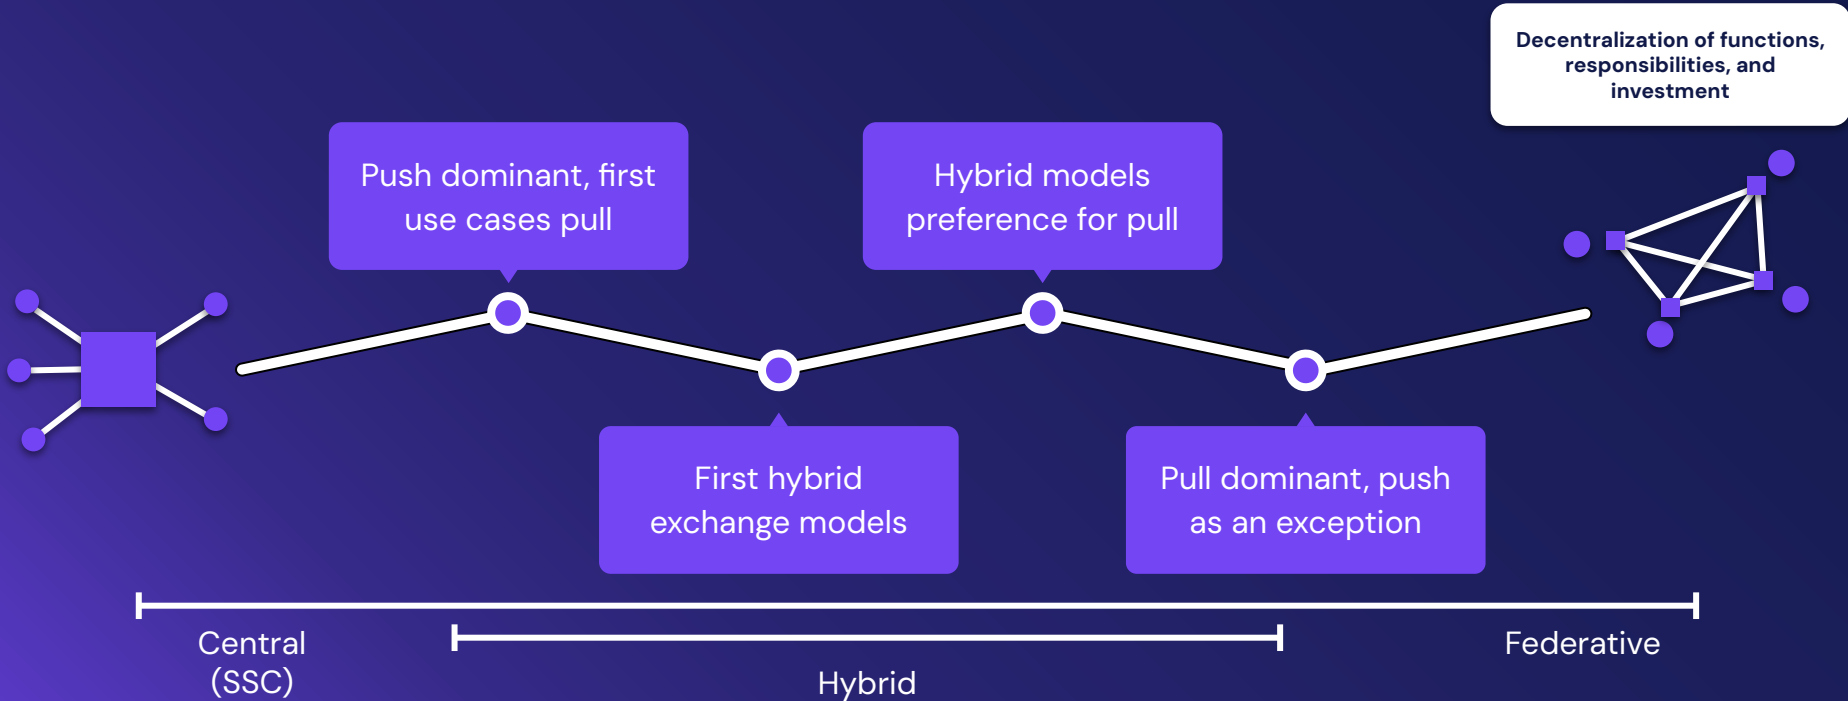

# 4

## The way forward

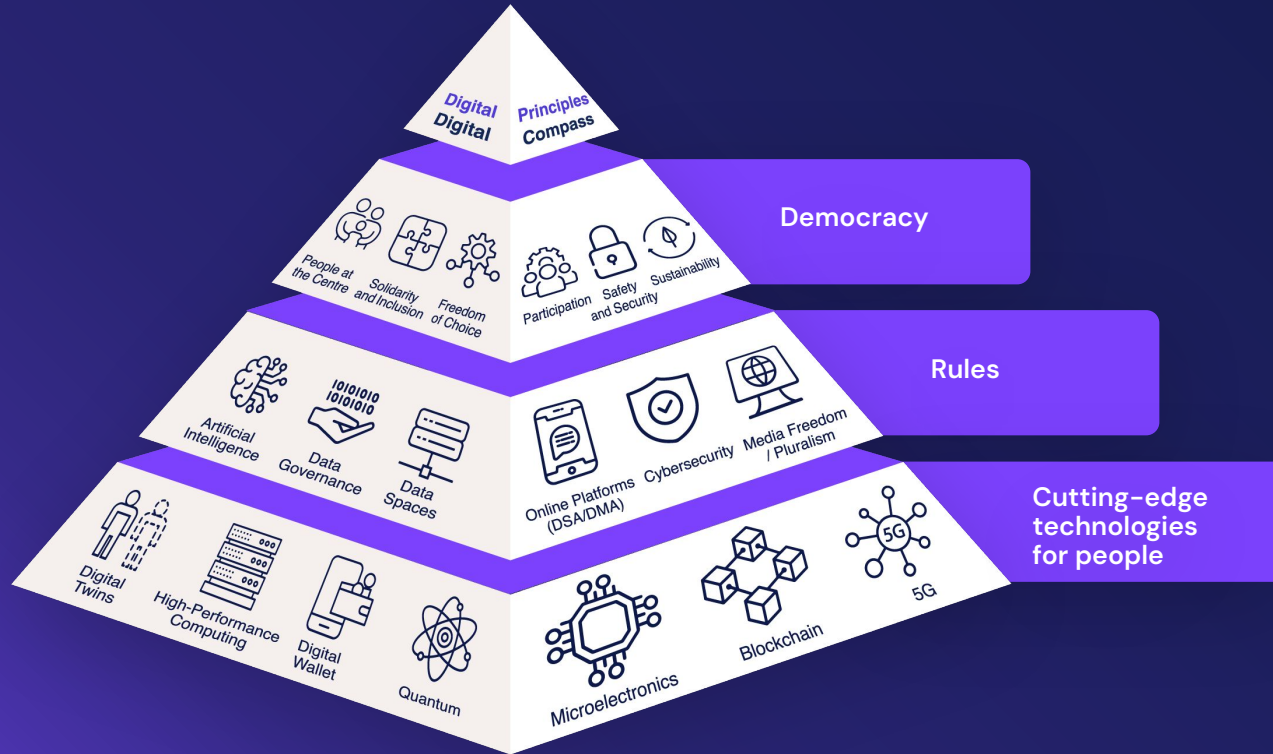

**Do you know the concept of  
federated data sharing?**

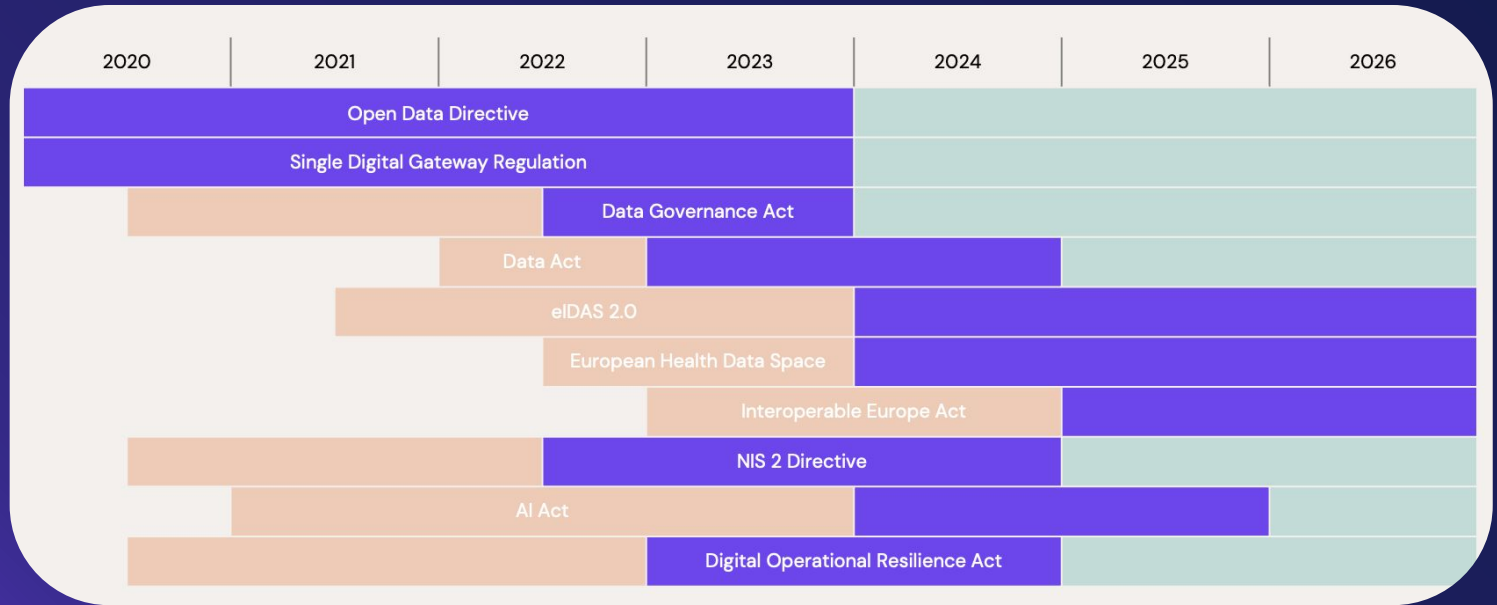

# From centralized to federated

# What is happening in Europe?

# The legislative agenda of Europe

Legend

- Grace period
- Legislative process
- Obligation

# 5 steps to start with professional data exchange

1. Gain knowledge of legislation and technology
2. Automate data exchange
3. Use shared solutions and best practices
4. Improve synchronization within your chains
5. Shift perspective: see legislation as an opportunity
